DETAILED ACTION

Claims 1, 4, 7, 10-14 and 17-22 are pending in this application. Claims 1, 4, 7, 14, 21 and 22 are independent claims.

The present title of the invention is "Apparatus and Method for Correcting Keystone Distortion".

Allowable Subject Matter

1. Claims 1, 4, 7, 10-14 and 17-22 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Prior art references do not anticipate or suggest the limitation "A horizontal size generator that receives N horizontal sync signals of an input image and generates N corresponding horizontal output sizes, each of said output sizes being generated at each of said sync signals based on a horizontal input size, a vertical size, and a desired keystone factor of said input image; and a format converter that receives said input image and generates an output image, by converting the received input image based on the horizontal input size so that each line of said output image has a horizontal output size corresponding to a successive one of the N horizontal output sizes generated by said horizontal size generator... a line memory that stores each line of said output image generated from said format converter and outputs said each stored line of said output image according to said read control signal" in combination with the other claim limitations in claims 1, 4, 7, 14, 21 and 22.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
